### WHAT WE'RE BUILDING

Computational Storage is our vision for the future of data center infrastructure. We're adding smart compute engines to next-gen flash to create a whole new class of product that supercharges application performance. Trailblaze with us in the post-Moore's Law world as we tackle the industry's top upcoming challenges!

### IT'S A GREAT TIME TO JOIN!

After multiple years in R&D, we launched our Computational Storage products in August 2017 to phenomenal response. We're now shipping to customers across the globe, and rapidly building our team to meet the demand.

### COMPANY

We're headquartered in San Jose, right next to SJC airport.

We've raised multiple rounds of funding from top-tier corporate and VC investors and have filed 40+ patents for our flagship tech.

### CULTURE

We have a multicultural staff and are growing fast internationally.

We enjoy a totally collaborative transparent work environment that's not afraid to celebrate as we race past more milestones.

### PERKS

- Catered lunch & dinner
- Team-building offsite events
- Happy hours & all-hands

- Competitive compensation including equity, healthcare, vacation, 401k, and phone plans
